

Rank participants then use the rank to determine which letter in their name is used

Wortox recently competed in a West Coast Swing competition. He won, despite what judge 3 thinks, since he has the most 1s. The person with the most 2s (and 1s) places second. The person with the most 3s (and 1s and 2s) places third. etc. Find the order that everyone placed, and find the congratulations *letter* each person has by their placement.

Participant	J1	J2	J3	J4	J5	Rank
<u>W</u> ortox	1	1	7	1	1	1
K <u>a</u> yleigh	7	4	1	7	7	7
W <u>e</u> ndy	6	3	4	2	4	4
W <u>a</u> tson	5	6	6	5	6	6
A <u>r</u> chie	4	7	5	4	2	5
N <u>e</u> d	3	2	3	6	3	3
M <u>e</u> i	2	5	2	3	4	2

1 2 3 4 5 6 7 Order them according to rank

Codeword 1:

wedding

Playing FieldMojo has killed some of the grass. *Bi* the way, dead grass really *turns me off*.

Spelling out:

The deadness of the grass turns into Binary

1	0	0	0	0	p
0	0	1	0	1	e
0	1	1	1	0	n
0	0	1	1	1	g
1	0	1	0	0	t
0	1	0	0	1	i
0	1	1	1	1	o
0	1	1	1	0	n
0	0	1	1	1	g

Codeword 2:

pengtiong

These yogis are warming up for some acro, there must be a clue here... *flag* the first three things you see in common!

3 grey shirts spells out "com" in semaphore

Codeword 3:

com

This is also the first three letters in "common"

Secret message:

wedding

pengtiong

com

Hint: Think about the words in italics

Hint: This may be useful: pengtiong.com/puzzledpint

Code1: The order of letters of each person's name matters

Code2: Binary thinking never helps... or does it?

Code3: Sailors used semaphore flags to convey messages at a distance
